

## Product Information Sheet

### Vi-Pro® WIPES

Version: 1-EN

Revision date: 07.09.2020

### Vi-Pro® WIPES

#### Product description:

Vi-Pro® WIPES are used to remove partially cured and uncured sealants including, silicone, polyurethane, and polysulphide from hands, tools and surfaces. They will also remove wet paint, putty, glue, mastic and resins.

Vi-Pro® WIPES are a non-woven towelette impregnated with a mild water-based cleaning solution. The soft absorbent surface lifts and removes "sticky stuff" leaving the surface clean. Vi-Pro® WIPES are big enough to tackle the worst cleaning jobs including the removal of general grime, grease and oil as well as the uncured sealant, paint, glue and resin.

#### Typical properties:

Appearance:	Wipes
Color:	White
Odour:	Sunsplash

#### Recommended application conditions:

Use Vi-Pro® WIPES to remove excess or surplus sealant and adhesive before it cures. This early removal cuts down the time needed for post installation cleaning. Prompt removal from hands and equipment is good practice and avoids the transfer of sealant to surfaces making cleaning quicker and easier.

Use Vi-Pro® WIPES when painting. They quickly remove wet paint from surfaces and hands. Ideal for use when using resin fillers, glue and glass fibre resins. Keeps hands and surfaces clean.

Vi-Pro® WIPES do not dissolve "sticky stuff" such as sealant, paint or glue. They work by picking it up from the surface. This means it is not spread or smeared, so clean surfaces and clean hands are readily achieved.

#### Cautionary Notes:

Keep dispenser closed to prevent wipes drying out.  
Dispose of wipes with non-toxic waste.

#### Packaging:

Vi-Pro® WIPES are non-hazardous for shipment by air, sea or road. They are available in the following container size:  
Tub of 100 wipes or Tub of 300 wipes
