### Accountabilities for PCR, LCA and independent, third-party verification

Product Category Rules (PCR)

CEN standard EN 15804 serves as the Core Product Category Rules (PCR)

Product Category Rules (PCR): PCR 2019:14 version 1.11 (EPD International, 2021a)

PCR review was conducted by: Martin Erlandsson, IVL Swedish Environmental Research Institute, martin.erlandsson@ivl.se

#### Life Cycle Assessment (LCA)

LCA accountability: Pär Lindman, Miljögiraff AB

#### Third-party verification

Independent third-party verification of the declaration and data, according to ISO 14025:2006, via:

 $\boxtimes$  EPD verification by individual verifier

Third-party verifier: Dr Hudai Kara at Metsims Sustainability Consulting, www.metsims.com., Oxford, U.K.

Approved by: The International EPD® System

Procedure for follow-up of data during EPD validity involves third party verifier:

 $\Box$  Yes  $\boxtimes$  No

The EPD owner has the sole ownership, liability, and responsibility for the EPD.

EPDs within the same product category but from different programmes may not be comparable. EPDs of construction products may not be comparable if they do not comply with EN 15804. For further information about comparability, see EN 15804 and ISO 14025.

## **EPD**<sup>®</sup>

## **Company information**

Owner of the EPD: Proventuss Polska Sp. z o.o.

<u>Contact:</u> Krzysztof Nadzieja <u>krzysztof.nadzieja@proventuss.eu</u> +48 696 202 456

Description of the organisation:

Proventuss is a manufacturer of high-quality EPDM membranes under the Vi-Pro® brand, offering efficient and reliable water and weatherproofing solutions to extend the lifetime of buildings and other structures.

Proventuss provides customized sealing solutions for facade sealing applications, improving performance and durability with environmental benefits. Proventuss offers complex system of membranes and adhesives for sealing foundations, facades and roofs.

The strengths of the Proventuss Group lie primarily in its extensive experience, excellent organization and use of modern tools as well as our technical skills. Close cooperation with our customers to bring most efficient and long lasting solutions, it is our mission and daily obligation."

Name and location of manufacturer: Flisa 4, 02-247 Warszawa, Poland

### **Product information**

Product name: Vi-Pro EPDM Membrane External

<u>Product description</u>: Vi-Pro EPDM membrane consists of a product range of EPDM strips and accessories with properties that provide a seal against water, moisture and air tightness. The Vi-Pro EPDM system has been developed for weather-resistant seals around window frames, facades, sill insulation and weather protection for other types of building structures and for damp proof course (DPC)

<u>UN CPC code:</u> 54530

Geographical scope: Manufacturing in Sweden and End-of-Life in Europe

LCA Information	
Functional unit and dimensions:	1m <sup>2</sup> of Vi-Pro EPDM Membrane external with a thickness of 0,75mm (other thicknesses available)
Description of system boundaries:	Cradle to gate with options, A1–A4 + C + D
Time representativeness generic data:	2019-2021
Data collection period specific data	2021
Database and LCA software used:	ecoinvent 3.8 geographical scope Europe, SimaPro 9.3
Electricity data:	Nordic residual mix based on Grexel 2021 is used for representing electricity in manufacturing
Allocation:	Polluter Pays / Allocation by Classification
Impact Assessment methods:	Potential environmental impacts are calculated with Environmental Footprint (EF) 3.0 method as implemented in SimaPro 9.3. Resource use values are calculated from Cumulative Energy Demand v1.11.
Based on LCA Report:	LCA report 1035b Vi-Pro EPDM Membrane, Proventuss

## **Content information**

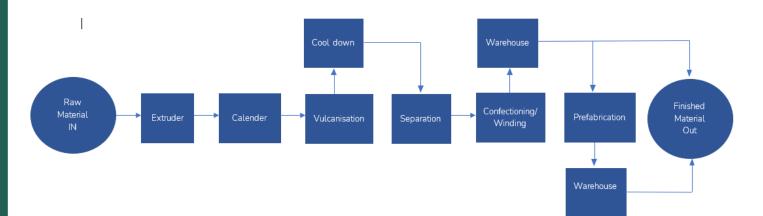

The product documented within this EPD contains no substances in the REACH Candidate list. The values % below are rounded figures.

Product components	Weight, %
EPDM polymer	22
Pigment and filler	53
Plasticizer	21
Resin	2
Activator	1
Accelerator	<1
Curative	<1
Packaging materials	Weight-% (versus the product)
LDPE	0.5
Cardboard	1.2
TOTAL	1.8

## Manufacturing:

First the compound from the supplier is run through a calendar machine, to get the right dimension on the order. Uncured scrap is recycled immediately and processed again through the extruder. Thickness is continuously controlled during calendaring.

Secondly the product is moved to the vulcanisation furnaces. The process involves the formation of cross-links between long rubber molecules to achieve improved elasticity, resilience, tensile strength, viscosity, hardness and weather resistance. The vulcanised sheets are through an inspection station and then are cut to the desired width and packed according to specific customer order.

## **Environmental Information**

### Potential environmental impact – mandatory indicators according to EN 15804 Results per 1m<sup>2</sup> of Vi-Pro EPDM Membrane external with a thickness of 0,75mm

## Information on biogenic carbon content

Results per 1m <sup>2</sup> of Vi-Pro EPDM Membrane external with a thickness of 0,75mm										
BIOGENIC CARBON CONTENT Unit QUANTITY										
Biogenic carbon content in product	kg C	0.00E+00								
Biogenic carbon content in packaging	kg C	3.60E-02								

Note: 1 kg biogenic carbon is equivalent to 44/12 kg  $CO_2$ .

## Additional information

#### **Exceptional Durability:**

Vi-Pro EPDM membrane has a very good resistance against UV and ozone. EPDM has no yield point, which makes is very suitable for façade applications.

The membrane remains flexible at all times and can withstand mechanical stresses that are common for this application.

Vi-Pro EPDM can be used in both cold and hot environments, from the north to the south of Europe, thanks to its cold bending properties below -40 °C and to a temperature resistance up to 120 °C, without significant change to the flexibility of the membrane.

Vi-Pro EPDM has good water vapour permeability, needed for optimal functioning in facades. It is available in different thicknesses to fit all façade applications.

EPDM waterproofing membranes have a life expectancy of more than 50 years. This test was performed by SKZ in 2004.
